

PROFESSIONAL FIRE SAFETY ENGINEERS

Due to unprecedented growth across the International Fire Consultants (IFC) Group we have several positions in our IFSET office, based in Asse (Belgium).

IFSET as one of Belgium's leading professional fire safety engineering consultancies is anxious to recruit enthusiastic technical capable engineers willing to tackle challenging projects as members of a hardworking but friendly team. The following positions are currently available:

FIRE SAFETY ENGINEERING MANAGER (Belgium)

You will have a minimum of five years experience in the assessment, preparation of fire strategies & the design of facilities for fire safety. This will include the preparation of design drawings, tender documents as well as supervision of constructions works.

SENIOR FIRE SAFETY ENGINEER(S)

You will have a minimum of three years experience in the assessment and preparation of concepts for fire safety and a range of commercial and/or industrial prospects.

Fluency in French and Dutch is essential whilst English will be an additional asset.

We offer very competitive salary and benefit packages.

For further information or information discussion you can contact Mr Marc VAN CAEKENBERGHE: 0476.991.393
